Note 1: Settings for the entire Vehicle and it's configurable ECU's is held in the vehicles CCF, Car Configuration File). This CCF data is held in one ECU and shared with all other ECU's via the vehicles CAN BUS.

The ability to alter absolutely all CCF settings is provided via our extremely advanced on line resource, Genesis, which also provides Land Rovers Unique per VIN "AS Built" copy of the CCF and the ability to save different versions and upload "As Is" CCF's to make a library of changes and modifications.

This document is provided as a general guide only and while it is accurate to the best of our knowledge, however it may contain omissions or errors and is dependant upon vehiclular variations beyond its scope.
