

MOBILE DEVICE SPECIFICATION

Operating system

The Application is currently provided for Mobile Devices running the Android operating system only. It is currently not available for any other operating system such as Apples IOS or windows but these are expected to be included in the near future

Device format Type

The Application is supported on Phones and Tablets only, It is not supported on Televisions, watches, other wear equipment or VR equipment.

Android Operating System (OS) version

The minimum Android operating system required is Android 5.1 aka Lollipop
The latest Android operating system that has been tested is Android 9.0 aka Pie

Screen Size and Resolution

The Application has been developed to natively support most current screen sizes and resolutions of Phones and Tablets. as such it is very unlikely that you will exceed the minimum or maximum limit on screen sizes and resolutions for supported Phones or Tablets.

Ram, Main and Graphics Processor requirements

The Application is not particularly demanding in respect of Ram or processing power in both graphics and Main processor, However the faster and more capable the mobile device is the greater the experience will be.

Connectivity

To Communicate with a VCIQ the Mobile Device will require to have Bluetooth connectivity. Mobile Devices with SIM cards that provide Phone network communications will also be able to use the SMS notification functionality of the Application
