# **Faultmate FCR**

**The simplest and most cost effective way to  
Read and Clear all Fault Codes  
on your Land Rover Vehicle**

## Introducing the Faultmate FCR

As such, this truly innovative Fault Code Reading and Clearing tool is certainly not one of those many "Engine Only" OBDII Scan Tools, which have become extremely prevalent in the Market, promise everything, but deliver next to nothing. The Faultmate FCR is in fact designed and manufactured specifically for reading and clearing all possible fault codes on every system with built in fault code storage capability on board each Land Rover model it covers.

For exact listings of all the Onboard Vehicle systems covered by the various FCR versions:

[http://www.blackbox-solutions.com/downloads/vehicle\\_coverage/System\\_Coverage\\_by\\_Vehicle\\_for\\_Faultmate\\_FCR.pdf](http://www.blackbox-solutions.com/downloads/vehicle_coverage/System_Coverage_by_Vehicle_for_Faultmate_FCR.pdf)

### Attention:

The Faultmate is extensively tested and has hundreds of satisfied purchasers. As such we guarantee it will read and clear the stored faults in the ECU, which can occur mostly through electrical or mechanical problems and could render the vehicle inoperable, clearing faults can get you moving again but if they don't go away or return after clearing you will need to investigate further.

You may have also noticed that the Faultmate FCR also has a Mini USB connection. This is to enable it to be connected to a PC with the supplied lead for downloading software upgrades or changing vehicle type licence. There is now also a connector available to power the FCR via 12V DC rather than the vehicle for software or licence upgrades. See item AC012 under the Faultmate FCR section of the web shop.

### Single Vehicle use

Provided and priced as a personal use item for, the FAULTMATE FCR is provided specifically licensed for use only on one single vehicle (Single vehicle meaning one unique "by VIN" Vehicle, rather than a model range) It must not therefore be used on any other Vehicle of the same make or model. However for just a small Admin fee, it is possible to re licence a unit to a different Vehicle at any time, including a different model.

The Faultmate FCR is designed to be extremely easy to use as can be seen in this video:
